Scaffold Planks

ONE STEP AHEAD WITH SAFETY AT WORK

The PF group, based in Denmark, has production facilities in Holland, Germany, Belgium, Norway and the UK. Innovation and product development are the cornerstones of the Group's marketing philosophy.

The main factor in its success is the identification and fulfilment of customer requirements. Involving customers in the development stage has resulted in products which are exactly matched to the circumstances and conditions.

After-sales service is another high priority. Project and quality control ensure that the required delivery times and quality standards are met.

We expect further growth of the PF Group as a result of the activities of the Company's own expert resources, continued investment, and through working with companies who possess special expertise within their field.

30 years experience

With more than 30 years experience in designing and manufacturing scaffold planks, decks, toe plates and scaffold staircases. PcP is one of the leading manufacturers of scaffold planks within the European market.

Innovation and design

Product innovation is the cornerstone of our scaffold programme. Through continuous product reviews we are able to produce designs to suit market changes and specification demands.

By maintaining close contact with the industry, scaffold users and scaffold manufacturing company's development of our products is carried out. This is undertaken using the latest 3D CAD/FEA systems and specialised testing facilities for full scale simulations.

Conforming and changeability

PcP has a wide-ranging programme of standard scaffold planks, which can be used with most well known "System Scaffold" constructions.

Our planks conform with most other scaffold planks or decks. In addition, PcP will undertake to design "Bespoke" plank and platform systems to suit individual specifications.

Product Features

- Slip resistant surface
- Good drainage
- High strength to weight ratio
- Minimal maintenance
- Aluminium and Steel options
- Load classes 3-6
- Can be adapted to all systems
- Patented hook systems
- Approved according to EN 12811
- Single planks or as decks
- Extended life and durability
- Bespoke designs available
